## New Oric <br> From from page

excellent graphie commands which can give 3D effects. Oric has really gorte to town on the graphics."
Mr Everiss, formerly operations director at Imagine, explained how sound is also enhanced: *'The Oric contains a Gi sound chip, which was never used to the full. The new machine really ues the chip to its limit"

The IQ 164, as the machine is currently known, has black and red plastic casing. "It's a 6502 machine uprated from the Atmos, said Mr Everiss. "There's roon for two ROM curtridges, one of which will be the language, and one the application.

One of these cartridges will hold 64 K and the other 48 K of ROM, and there'll be 64 K RAM on boasd. We're really giving the user quite a lot of memory.
"It has an RS232 built-in, a disc contraller and a built-in modem driver," he went on. "There's also two joystick ports.

The machine will be supplied with SuperBASIC and one ROM cartridge. As for software, here at Tansoft we have something very innovative and interesting up our slecve, but I'm not prepared to divulge any details since I don't want our
competitors to get in on the act."

Mr Everiss explained why Oric hasn't fixed the price for the 10164 yet. "It all depends on what happens with the dollar, and what happens to chip prices. If the pound strengthens against the dollar and chip prices fall we will be able to bring the new computer out at the price we want."

The 10164 will be launched first in France, where Oric holds over $\$ 0$ per cent of the market. It will be marketed there as the Siratos - - a name already registered by another company in the UK.
"Our advertising agency screwed up on the name" said Mr Everiss. "The Atmons was released as the first in family of names, but what the advertising agency forgot to check was whether the other names were registered here."

The words come from the Grcek - atmosphere and stratosphere, etc. And Oric is now rather stuck for a new -TIIE
"If any of your readers have any suggestions, l'd be pleased to hear: he joked.

## Popeye, the sallor man

Popeye, dk'tranics" first licensed game, is now available, after 10 weeks of programming by a team of five.

The aim of the game is 10 build your "home swaet home", and you are cast in the role of Popeye - who else? Bluto is your arch encmy, and you must evade him while you gather up all your building materials from the building site,

Wimpy helps you by taking your items back to the start, However, you have to pay the price of his services by keeping him supplied with hamburgers.

Bluto is after you, and he wants to throw you off the scaffolding into the sca. Olive Oyl comes to the rescue by suppling you with the vital spinach which makes it man out of 8 mouse.

Cost of the game: £5.95.
dk'tronics, Unis 6, Shire Bill Ind Err, Saffnon Waiden, Essex CBH $3 A Q$

## Prices slashed

Mastertronic, who brought you cut-price arcade games, is now taunching budget-price adventures.

Master Adventurer is the label on which the low-cost adventure games witt be released, and the games will $\cos £ 2.99$ and $£ 3.99$.

Se-Kas of Assiah is the first release on this label. Mastertronic had intended to release this adventure in September on the Mastervision label formerly Carnell Software. However, the company decided to delay the launch of Se-Kaa until now, and cul the price from $£ 7.50$ to $£ 2.99$.

Se-Kaa is available for both Commodore and Spectrum, and contains 96 K of graphics adventure, with more than 170 illustrated locations and fult sentence analysis.

Pre-Christmas releases on the Master Adventurer label include Volcanic Dungeon and Black Crystal for the Spectrum, at $£ 2.99$ and $£ 3.99$ respectively. Black Crystal will be available for the Commodore in the New Year.

Mastervision will remain a separate label, at full-price. Large format packaging and extensive accompanying literature will continae to be the company's hallmark, according to Mastervision.

Martin Alper, Mastertronic managing director, said: "We intend to do the same with

Master Adventurer in the field of adiventure games as we have with Mastertronic in the lield of arcade games - in other words, produce a series of good quality programs at a very realistic price.
"Master Adventurer games will combine text with fult scrolling graphics. For $£ 2.99$ you can expect programs of a quality which would normally cost 18 at the very least:"

Mosterfronic, Park Lorne, //I Park Rd, LDndon NW/8 $7 J L$

## Menture on

Audiogenic has announced two new graphic adventures for the Commodore 64: Magic Stone and Time Traveller.

Here's the plat of Magic Stone in a mutshell: the stone in question is reported to turn lead into gold. You must find the stone and the experimental notes, as well as the magic word. The setting is a Transyl. vanian mansion.

In Time Traveller you must restore the balance of time, which has been disturbed by the evil Gral von Schwarzherzen. You have a few problems though - you don't know your identity or your deutiny, and you must find that out first.
Easy English language commands, sound music, and a good plot are all claimed to be star features. And a Koala Pad will be awarded to each of three winners, who manage to solve each adventure in the shortest possible way.
Price: $£ 5.95$.
Audiogenic, 39 Sutions Ind Park, London Rd, Reading, Berks RG6 IAZ

## OL monitor

Prism has announced the taunch of a new 14 -inch monitor for the QL. The QL14 costs $£ 199.99$ and comes with connecting cable, which plugs into the RGB port.
It is light-weight, and has a retractable handle, which means that il's very porlable. The unit is all-black and has a detachable antioglare tinted glass front.

Prism's monitor provides full A4-width on Ouill, greater resolution for business graphics with Easel, larger record layouts with Archive and a greater number of columns visible on Abacus, according to Prism.

## NEWS

## $C 16$ first

Tynesoft claims to be the first company to have Commodore C16 and Plus/4 software available.
The company is releasing a starter pack for the C16, which will cost $£ 14.95$ and contains four games.

Tynesoft, Addiston /nd Est, Blaydon upon Tyne, Tyne and Wear NE2I 42E

## EPROM erciser

Ground Control has now announced the Uvipac EPROM eraser.

The Uvipac is housed in a 90 $\times 80 \times 40 \mathrm{~mm}$ plastic case, and a special type of discharge tube is used to achieve such compact dimensions. According to Ground Controls, the 230 or 110 volt mains powered unit enables up to three EPROMs of any size, or I cpu with on-board EPROM to be erased in 15 minutes, usually.

Ground Conirol, Alfredo Ave, Hullbridge, Essex \$S5 6LT

Ground Coatrol's Uvipac

## NEWS

## Late starter

Although announced months ago, it is only now that PSS has managed to release Hyper Biker.
According to PSS, the delays were due to the amount of data needed to ensure that the program was as complete as possible, yet with high quality graphics, therefore causing a shortage of memory.
PSS claims that he game was well worth the wait, and four players can act out the more sophisticated manoesures of BMX racing. Hyper Biker is available on cassette at $\mathbf{\$ 7 . 9 5}$

PSS, 452 Stoney Stanton Rat, Coventry CV6 5DG

## Royal romp

Henry's House is the titie of English Software's new game for the Commodore. As you may have guessed, the star character is a little prince, who lakes you on a right royul romp through his ncw home. Yau go from the clothes cupboard to the dungeon, in "an entertaining extravaganza of domestic distractions", necording to English Soltware.
The game is ciaimed to feature the highest standard of detalled hi-resolution animated graphics seen on any game on the Commodore 64 . The game features Pavloda fast-load and cosis EB.95. Pre-release publicity for the game states that Henry's hoose is "a saturatingly satisfying game for even the most insatiable of ptayers! Tentalising and tormenting, but at the same time rivetingly rewarding!" No, it's not the Gold Old Dayw, either.

English Software, Box 43, Manchester M60 JAD

Caste's Banuma interface

## Yes we have no bananas

## The Banana is the name of a

 new micro interface, from Castle Associales of Scarborough. The company claims it's so simple to use, even a monkey could operate it.It is housed in a heavy duty metai case, to render it virtually unbreakable in the hands of students, and comes together with a comprehensive instruction book. which contains introductory programs and experiments. Also included in the purchase price - 2175 are interface cables for connecting the Banana to the BBC.

Features include eight indeptendent outpuls driving relays, and $8_{0}+12$ volt logic signals for controlling DC motors, Stepper motors and other devices.

According to Casile, 'the Bunana interface allows interactive control, adding a whole new dimension to compuring:"
Castle Asrociares, Salter Rd, Cayton Lower Rd Ind Est, Scarbonouth, N Yorks YOII $3 U Z$

## Best selling book

Frederick Forsyth's book The Fourth Protocol was a bestseller - and now the book has been adapted into a software game.

The company behind the project is Hutchinson Computer Publishing and the company claims that the game "will set new standards for electranic adventures. It brings to the world of computer games all the excitement of Forsyth's famous suspense, his mastery of chilling detail and a very clear lasighi
into the workings of international espionage agencies."
You are in control of M15 operations and you must track down a deadly enemy at large in England. Available late spring. the game will run on the Spectrum and Commodore.

Hurchinsen Computer Pubhishing, Hutchinson Hse, 17-21 Convay St, London Wif $60 D$

## Amstrad adventures

Interceptor Micras has announced its second adventure game for the Amstrad CPC 464 . Forest at World's End is a graphical adventure which costs 86.

Future citles from interceptar for the CPC464 are Jewels of Babylon and Heroes of Karn.

Interceptor Micros. Lindon Hise, The Green, Tadley, Honts

## Ingenious...

Software by...

# The Pettigrew chronicies CBM 64 E9.95 

Shards, Sule G, Roycraft Hse, Linton Rd, Barking, Essex

This is a four part adventure on two cassetles. There are two game on each cussette. You have to solve the tirst to obtana code which allows yat to load the second
Theste are text advenures with the occastonal diagram, such as the London Underground map. The texi messages and background information are lad our neatly in coloured boxes on the s rem

I found the messages difficult of remember at they scrolted actoss rather lake a meon sign, On some occasions: I had to tepen! certan mequerces Just to get a second glance at them

Your required response consists of two words in the format of Action - Object. found the yncabulary somewhat limuted and wes constanity faced with the messages "Never heard of that nbyect and 'You can't do thas'

The adventure was realistic about the place setturgs, the universicy at Readiag, the red light district of Kung's Cross etc. However it is advertised es a tamily tame so II won't go into detals

As four tames in effect for the pruce of one, il is good value but the garmes did not appeal to me, L.C.

## Erik The VIking CBN B4 E9.95

John Waley, Baffins La, Chchester, Sussex PO19 1UD

Thes fully thestrated adventure 15 ta fact writern by Levet 9, and is a very impressive text and graphics game based on The Sage of Erik The Vitmin by Teity Jones.

The fane ditself is set in the cume of the Vikings, and out hero Enk - played by yourself - te the sole survivor of a raid on his bome vllage on Norway by E tribe of evil creaturti. As the slory unfolds you may wander found has farm, which tis depicted in authentic Norse tylle, to gather equipmenl for har zeath for hus missing famsly
As usual, any cornmand may be typed in Emglosh, end a clever command parser evaluates your instructions, respondigg wilh
various prompes to ad understanding. Help factintes are avalable through a postal service by Mosalc Publishing

Thus adventure is very enjoyable to play, the ulusmations are Well done and the range of possble stituations makes is absorbing. It lis not however tasy to play, and $T$ must confess I have still to board the Golden Dragou and begn the quest proper, Thoroughly recommended for all adventure players.

## Tomb OF Akhericrten 48K Spectrum R2.99

Charlie Charle Sugar, 14 Lang ton Way, London SE3 TTL

Thut game deserves an award for worst compuise game of the year!

You play en explorer who has stumbled across a tomb filled with labulous treasure. Screen dusplay shows a crude maze plus your atrenth mind treasure ralungh. This is not an arcade, game; you move your one character suted mand around at deathly wow pree, trying to find the key and door to the next maze
Hazards come in the Jorm o' spiders, ispsi and sporis, which topear at ranclom and can be rought or occasionally bribed (rather pointess), It's all really thriling stuff, with four different mares to pet through
Graphes are provided by thes Leer Defined Graphics, whsch jerk sions With uninspired animation and defimition. Sous. considerably slows the game down alihough the tunes, playec at such excixing times as reachink a magic place (saps or adds to your strength), are good. The game is writen in jnefficent BASIC, 日лd is unplayable without cheatmg. There is a hallit of fame, but wion would play it mare than once?
This really is rotal rubbish even at the cheap price. Avoid it like the plague.

# Mysterious and exciting 

## Adventure games of every kind. Enter the tombs of doom or travel through Viking Norway

## The Staff Of Zaranol 48K spectrum $\varepsilon 5.95$

C.C.S., 14 Lanston Wray, Lon don SE 3 TTL

Thas sext anly adventure wat produced by Quilt and as such I fatel that in today's chmate of falling software prices, if is a little over pruced.
You tre the epprentice of Zarnnol, anghty sorcerer and while he's away at a convention, you summon tp a demon, who curses you. Your objectave is to remove the curse and bamsb the demon. You have a friend called Lan to betp with your quest. Although. 1 discovered that during really sucky patches. When I calicd for Lan, he appeared, laughed at me and disappeared. With fremds like

## that who meeds demons?

On my lirst attempl, managed to score a medsly 12 仵 before having my neck chewed by a vampure bat. Caught an the tatacombs, ns usizal
Alt the adventure fealares are present, plus as SAVE opuon, which is most helpful for those without vast tracts of time to devole in one mo.
On the whole, to's quite a subtle puzzle which should appeat to adventure puntsts. However, appeal to orhtr users paght be limated by lack of graphics and innovasion M.t.

## cuthbert Enters the Tombs of Doom CBM 64 E6.95

Microdeal, 41 Truro Rd, $\mathbf{S}_{1}$ Austell, Cornwal.
The Culhbert cult cominues with colossal capers in the latest eccapade from Microdeal. li's a five tarar game all the way.
The challenge consiss of over 200 chambersil How do they do u? Chambers are litered with keys, locks, ghostly ghouls, benstly bals, sadistic saxaphones - yes, saxaphones - sworded spheres, slekevab Jiends, transportation chambers and vanaus ireasutes

Then there are lamps to be filled to give temporary immunity from the nasties and exita lives to be won and fosi. Jt ts quite mend-boggting
With the casserte comes a join the Cuthbert Club registraum, a 16 page insiruction booklen sorry mantusernjt - autographed poster spplictilion with an meet Cuthbert competation and in key fob. It's superb packaging to go with an exceltent piece of software
The early stages start easily, but the going soon starts to get fough as Oxygen shonages began to penalise any delay. What's more, negoltaling a room once might not be enough, you may, have to go back more than once to puck up more keys. But thas's mough from me, you tl discover the rest when you buy t. B.J.

## 2X81 PROGRAM

## Rack your brains to come up with the right word. otherwise you die. Hangman conversion for the $\mathbf{2 X 8 1}$ by Timothy Pearce

 word or heing loy the neek
rence of a letter in a word wh. be shown if correct.
If you can't solve the puzzle and need help, press NEW. LINE. The screen will clear and revert to mormal, but an extra letter will have been inserted in the correct place. All occurtences of the letter will have been miserted.

Be warned: when prompted With the question Another go? $\mathbf{Y} / \mathrm{N}$, if you lype N the program will be lost

## Varablen

MS utle of canegory th use CSI check value to see if word has been picked before
ASI) check value to see if leter has been picked before
QS word selected from WS
CS wilue peturned by INKEYS
RA rundom value for clue deter
WS DATA strimbs
W' score word beins guessed Ts iolal wore
I control vatriable in loops
$j$ number of category beans used
$\mathbf{P}$ number of word selected from ws
V number of massake (used to select cortect gibbe drawing stubroutine)

## How to fmprove it <br> Add extra caltgories.

Speed up word selection process by making smaller groups of words in WS ar rindang quicker way of sortins the slring, or speed it up by not selecting randomty

## Convertsion

The string hindlane lunctions used could be replaced by READ

DATA routines or MIDS function could be used in place of the ZXBI's unusual strang handling method.

Colour coutd be added to the screen display med sound could also be added

## How it works

21-26 ask if instructions are required, act on reply
27-150 print menu, input and verify reply
160-250 put appropriate value 3nto Ms, select word, set
250-260 dimension artays
240-320 pul appropraste values into clieck arrays

## AMSTRAD CPC464

## Prlce: E229, E349

Memory: 64K RAM 32K ROM (42K usable)

Keyboard: Comprehensive typewriter style, 12 user-definable keys alreakly detined as a numeric keypad Dedicated cursor control keys, real space bar
Screen: Three modes, $640 \times 200$, $320 \times 200,160 \times 200$ m 2,4 or 16 colours selected from a palette of 27 and 80,40 , or 20 characters per line. Changing modes does not increase memory consumption.
Sound: Three sound and one nouse channel through internat speaker.
Languages: Locomotive BASIC
the older type of business riachine.

1. O: This is a compurter's means of taking to the outsude *oriu. It can mean jnystick ports, pinter threriates or any ohter inter-devive commun cat ons को stem
Software: A brict word on what $k$ nd of sottware is atailable for the mathilie and in what q, arıtté
Opunon: 1 lus Is hhat I think of the mathone after using ut and comparing it to all the orhers in the tevi

If fou are busing a second compater or upgras is the at of spectilattons stinutd hep you on thowsing a mathote Wh it isn't wo las away Irom What bow've been used to I WNO 901 wat. and rather you than met!
included. Very good at certan functions like graphics, sound and structuring but needs spaces everywhere which is very awkward. The editor is also rather crude. BASIC has some bugs in It
Prucessur: Z80A
speed: Fast
Suftware: Amsoft, the software arm of Amstrad, is commsstoming at big a range of software as it can get together. There should be lors of games out in the very near future. The games cursently out are very poor quality but should improve.
Opinlon: Good value with the inciusion of a montor and a tape recorder. Relabiluty mas the a problem as Amstrad has a bad reputation for this. Tape recorders can be incompatible with each other in fast mode

## MTRF| 

## Price: $599 /$ ¹99

 Memory: 16K/64K RAM (amount usable varies with graphics mode used) 26k RomKeyboard: Full typewnter style keyboard, $\$ 8$ keys, four function leys, space bar but no dedicated cursor control keys. Screen: 16 screen modes compnsing five text modes and il graphics modes. Text is 40 columns by 24 lines in up to 256 colours. The graphics have a maxum resolution of 320 by 192 an the bigeest hu-fes mode All characters are user definable and come in predefined shapes to start with. Plaver/missile graphics - like sprites - are also avallable
sound: Four channel sound
generator with full software support.
Linguages: Atan BAS1C included and these are avalable' Forth, Pilot, Logo, WSSM, Pascal, Microsoft BASIC. Two types of assembler editor are also avalable.
Processor: 6502A
Speed: Medium to fast.
I/O: Serial unput/output port along with two connectors for two joysticks or paddles. Other interfiaces may be added via interface bus. Slot for ROM cartrdges. Cassette port will only ailow connection of Alari cassette recorder at $£ 44.99$, so this must be taken into account when considering costs.
Sultware: The XL series of software is compatible with older models so lots of software is on sale from both Alary - wheh has a lubrary of 500 tules - and from independents, including US ırtports.

ATMOS
Price: $\varepsilon 99-179$ Memory: 64K RAM f47K usable in text mode, 39 K in graphics mode) 16K ROM

Ketboard- Fuil thnewriter 97 kess, space bar, dedluated cursar contro keys, no delimatie function keys two furctions per key
Screen: 40 wolumns by 28 rows

Teletext compatible lext display, two wser deftrabue character sets, e,ght foreground and eight background tolowrs, douthe height, flaslurg and inveried ateribules athalabic for ea.h .hardeler Giraphics acreen gives 240 by 204 resolution. colours and atiributes are delurable on al grid of 40 by 200). In each of these areus the fortgrulid and backgro,nd cin be defined in exght colours. Fiashing and inseried oulput is also supported. In graphics mode three fines at the bosion
of the screen also apmear, and there are the same as the text mode lintes.
Sound: Sound getierator with three channets and norse gencrator There is a certant Gincunt of enverope control. Pre programmed sounds to produce pings and zaps, etc. Sosumd is proouced through an whernal spreaker although is fif ournul is avalaule through a Din socker
Languages Extended Macrocolt BAtIC bustin, avalab.c, BBC-Ishe BASIC planned Procetisur: 6562A
Sperd: Fast

- 0 Centroncs paratiel printer pors, Her pert, anomator port, expansian connector Softuare: Hads supported from das one Kange growing srinaller
Opinton: Thts computer was ongonally compared to the Sjeitrum, and this was fust lied as they were oulwardiy sum, lar and look she same the BASIC is eas.ee and is a structured form of the de focto standard Mirrosoft BASLC The kerboard is betrer, the graptics are bether, and th has real sound wh in is lacking in the sinctars mathone Incriaces are bu 17 in whin wothd normaliy cost extra The eage that the Spet trum has is more software. The more recent spectrums will nert tur some of the atalable suftware due to thternal dex.gn diteremies.

## BUE

Price: E399
Memory: 32K RAM 128K to 9K usable depending on graphics mode used) 32K ROM

Keyboard: Typewnter style, 73 keys, 10 user definable function keys, dedicated cursor control keys. Space bar.
Screen: Very complex. The simplest mode is Teletexi compatible and gives eight colours, Hashing characters, double height, and block graphes. Text is 40 columrs by 25 limes. There are seven other modes of screen operation ranging from 640 by 256 hr-res in two colours with 80 by 32 rext to 160 by 256 huryes in elght colours with 20 by 32 text. All 256 characters are user definable in all but the Teletext mode
Sound: Three channel music with a noise channel through internal speaker. Full envelope control is avalable from BASIC.
Languages: BBC BASIC is meluded - a very compre-

hensive implementation. As assembler is also buit in for machise code access. Forth, Lasp and BCPL are also available
Processor: 6502A
Speed: Fast.
I/O: RS 432 and Centronics printer ports. Four analogue to digital converters for joysucks etc, etght but programmable user port. The sube allows connector of processors and so on to disc interface. Econel networking, speech symuthesizer can be added
Add-ons: A great deal avalable both from independents and Acorn.
Soltware: A very large and wellwitten range avalable, meluding a lot from Acornsoft, the maker's software artn. Many educational programs of varying quality.
Opinion: The BBC is an excellent machine if you ignore the high price. Support from independent suppliers is superb, but Acorn has been slow on the hardware side. The keyboard 15 very good and there is a useful set of funcuon keys. The screen uses spiit cursor screen eduting which is the next best thing to full screen edung but not quate as easy to use.
The BASIC is excellent and makes good use of all the hardware features. This
computer is used by about 75 per cent of all secondary schools, so it 15 good for education as well as games. It also makes a good business computer, particularly with networking available.

## COMMODORE C16

Price: 159
Memory: 16K RAM (12K or 4K usable depending on oraphics mode used)
keys can be defined from BASIC and the layout is different. Separate dedicated functor keys and space bar. Screen: Three modes from BASIC, $320 \times 200$ and $160 \times 200$ graphics, $320 \times 160$ and $160 \times$ 160 with five lines of text, and $40 \times 25$ text. There are 121 colours and flashing all avautable at the same ume. The BASIC's graphic handiling is superb and unsurpassed. Outside BASIC there are another three modes and UDGs which need to be accessed by POKEIng.
Sound: Two channels of sound or one sound and one notse channel.
Langunges: Commodore BASIC 3.5. A ful] impiementaton of BAS1C with structuring and the most comprehensive set of graphis commands on any macro. Assembler/montor also included. The screen editor is superb and supports full screen edining and windows.
Processor: 7801 ( 6502 compal :ble).
speed: Fast to medjum,
Sofiware: Four software packages supplied as standard - chess, two pames, and a drawing program. More software should appear as lots of these should be sold up to Chrisimas.
Opinion: Thas is a real

Keyboard: Same as Commodore 64 except that function

Spectrum beater. The best value computer on the market, comes complete with software and a tape recorder.

## COMMODORE Plus/4 <br> Price: E299 <br> Memory: 6ak RaM 32 K ROM (60K Or 50K usable depending on graphics

Keshoard• Surmiar 10 the SX64 in feel function keys can be defined from BASIC Cursor keys set in a cross shape.

## Screen: Same as C16

## sound: Same as C16

Languages: 7801 (6502 compar1ble).
Processor: 7801 ( 6502 compat(ble).
Speed: Fast to medium
Soltware: Four home/busmess packages buth in - spread. sheet, word-processor, database, graphics. Games software should appear as this machine is compatible with the C16.
Opinion: As thus computer can run all Cl6 sofiware, games should be widely available after Christmas

## COMMODORE 54

 Price: E199Memory: 64K RAM
(40K usablel 20K ROM

Keybourd Tvpewriter qualist. 67 xers, spiae har, dicolualed functen keve although lus ure of these can orny be had thro, git an expanshon proptant Sereen: 40 coluring by 25 rows. 16 co ours, all erataters user definuble, hower case imeried oulput, two character sets. There are four different text modes but the format is the same for ali. The only dafference is in the handling of the colour.

There are two graphics mokes, 320 by 200 and 160 by 200 resolutrons in 16 colours. The difference is to do with colour: one mode uses the attribure system, simular to the Spectrum, white the other uses a pit stte system where each dot is its own individual colour, stmilar to the BBC or Dragon computers
Untortimately the BASIC dues hut sirpert the gedphis sid you must write your own reximes of but a BASIC exiension, Modes may aloo be mixed. Eight spritet are available and athough the BASIC does nos sulporre these curceily, instruction are then If the tratail on hou to ath eve thetr
Sound: Three channel muse synthesizer. Full envelope control and \waveform selection. BASIC does not support sound directly although, like the sprites. instruetion 13 given in the mataral on how to use sound Ingagges: Commodore BASIC supplied. Simon's BASIC, Forth. ## DRAGON 32 <br> Price: Less than $\$ 100$ Memory: 32K RAM (30K to 24KRAM usable depending upon graphics mode used) $\mathbf{7 6 K}$ ROM

Keyboard: 52-key typewnter style, space bar, no user definable cursor control keys Keyboard qualsy could be tmproved
Sereen: Text mode 32 columns by 24 rows, text in one colour.
no tower case or user definable graphics in colour, but there is an inverted output option. Texi mode does have block graphics in colour though. Graphics mode: ranges from 256 by 192 In one colour to 128 to 192 in four colours. Text is not supporied in thas mode. Sound: One chanrel music gencrator coverting five octaves, good software control.
Languages: Microsoft Extended Colour BASIC included. Identıcal to Tandy colour computer BASIC. Other languages from independents
Processor: 6809E
Software: Qune a lot dualable from Dragon and independents and Tandy (but check).
Opinjon: This micro is lumued by its very basce sound system and ats horribie text mode with very limitung formats. The BASIC is very gond at manipulating screen graphacs although

## GUIDE

It does not allow structaring An altogether much better buy than the Tandy computer to which it is so simeilar because It already has much of the expanston whech comes at extra cost for the Tandy machine and at a price that ss lower than the basse mittal price of the Tandy machine

Also a point to consider is the continumg avalability of thes machune since the bankruptey of Dragon

## DRAGON 64

## Price: Varles $£ 200$ + memory: 64K RAM fup to 48 K usable) 16 K 10

Dragon's big model offers three modes of operation: an emtulation of the Dragon 32 Extended BASIC with 48 K of usable RAM or what the company calls a 'soft machine' In this mode the BASIC is switched out for machine code programs or to add languages like Pascal An RS232 meterface is standard and the OS/9 multuser operatıng system can be added. A smali amount of dise based software, including business applications is available at present

## 팥TRON <br> Price: E199 <br> Memorv: 32 K RA星 19 K <br> to 12K usable <br> depending on <br> graptics mode used) 32 K ROM

Reyboard: Typewriter style, 56 keys, space bar, no dejwatied citsor control keys, no dedreated user definable keys, though the numeric keys double with the use of a function key. istreen: Stmilar to the BBC mucro, except for the lack of Teletext mode, sound and speed
Suund: One chamnel through internal speaker, otherwise as BBC.
Lnnguakes: BBC BASIC is built m, FORTH and LISP are avallabie.
Procensor: 6502A.
Spred: Medrum.
10: None on basse machine though there is wn expanston slot into which an expanston board can be plugged gaving the same sort of interfacmg options as the BBC but at extra cost. Sofiwgre: A growing range as soltware houses conven BBC programs.
Opinion: As this computer is very smmtar to the BBC with only some differences most of

Inv news on the BBC are true here, extept for the relerenties

## MSX <br> Price: Varles, around 250-E300 Memory: Usually 64k RAM (24K usable) 32K ROM

Keyhoard: Just about the only thung that varies from machine to machune. They can be quate good but I have used some awful ones. Seventy-three keys metluding five function keys and dedicated cursor control keys. but this can vary
Screen: Up to $40 \times 24$ text with $256 \times 192$ graphics in 15 colours All characters user definable sound: Three channels plus nolse
Languages: Microsoft MSX BASIC built in. Pascal and forth may be avalable
Speed: Medium
seftware: Very intele at present although il may pick up as soliware houses start converting their existing games to fit M. X .

Opinion: MSX is not a singic computer, rather a single design of computer made by different Japanese and Far Eastern electrontes companies. The only difference between models 15 the keyboard and extermal styling, although some machmes such as the Yamaha and the Sony are notable exceptions havang masic synthesizer and light pen optors, respectuvely.

This has the advantage that all of the machines should be able to run the same software (although in practice this is not so) and, to a greater or lesser extent, hardware.

The resulting compromase between many Japanese companues has resulted in a very
mediocre compurer, Software support, marketing, and price wit determine whether these machınes become successful.

Sanyo's MSX

## SIMCLARR OL

## Price: ${ }^{2} 399$

Memory: 128K RAM 44K ROM (96K usable)

Kevbogrd: P astic caps on tubber membrane Euty machones had some problems but latest modes are UK 65 keys meludng function and shrsot kens
Screen: 54? x 256 mm fous corours and $256 \times 256$ in cight colotres Thspitest the highest tecolution avallable but means Lial games which need the sureen to scroul are ditfiut to noric
Sound Beep
Inneages SuperBASIC in
ROM. A very advanced BASIC
with many data structures only founct in mush more islvallued fanklages Limited editor There is a large range of lanruages tiva dise, munding Be I'L, Lisp, Furth and Piscal. Processor: 64 (e)
Speed. Fast, but not fast encugh
10 . Large edge connector and two RD232 ports (nol fuiy implemented)
Opinton: This should have been the mawor mavi.ne of 1,84/85 but dice to beng lauriched before it was ready and software howses' relucrance to dupliale Misrodrive based sofituate it has falled to live up to expectations The 680 us processor is one of the faroured clips among machure code

## BDYERS' CuIDE

revampsed machme shound and wtt a lape interlace thas comptter could gltll be a major machine.

QL.

## SHELAM IK CPECTRON

## Price: £99£129 <br> Memory: 16 K 48 K RAM (7.5K39.5K usable) 16K ROM

Keyboard: Rubber mat type, 40 keys, no space bar, definable function keys or dedicated cursor control keys, five or six functions per key.
screen: 32 colours by 24 rows, but only 22 rows are avalable to the user. 256 by 176 high resolution graphics supported by BASIC, two colours from a palete of eight are available in 704 areas on the screen. Foreground and background colours for each of these areas can be selected as welf as whether the contents of the area are flashung or not. Two levels of intensiry are also supported. Twesty-one user defined character are avanable.
Sound: Internal becper.
Languages: Sinclair BAS1C.
This version is an extended
form of the type used in the 2X80. The extensions do not cover structured programmeng or atd functions and only deal with the graphics and file handling. This BASIC is very non-standard
toliware: A lor of software is Avalable for almost all applications, particularls gatmes.
Opinion: When the Spectrum first appeared it was an лпоуаtлол as the lowes! priced colour compurer. But newer designs have arnved recently with better technical specticathons and more usable memory at simutar prices.

The colour display is not good and a colour dssplay cannot be produced on a few colour TVs. With the Spectrum there are a lot of keywords to be fitted on a small keyboard Sound is through a beeper only the range of software is enormous
The 16 K version is no longer made.

## SINCLAIR ZX SPECTRUM +

## Price: E179 Memory: 48K RAM (39.5K usable) 16K ROM

Keybourd; Membrane keyboard
with hard plastic upners Very poor hati it bimulat atwo it 10 the $P$ Y spowtrum hat wth korg spane Datr Jet a, hat brrat control kers and 14 whetrextra kets kev drout meansthal $t$ is ditik it to pais cer din gatnes ard ontrol ir seriet ons mats the mean ngetess le g press arrow

I 色解 wriling at reply to Graham Busfield＇s letler in HCW B ig whem he pleads wilh sofiware producers to produce more games wath the famtly in mind
From thes first weck in December 1944 Chibur 15 lausching 5 brand new programs which have been carefully prepared dung 1884．One of them ar least has the famuly firmly in mind and is calied Take Over for the 48 k Spectntm．
t！䅗 a compleldy original game，which might be pompared wath Mosopoly， but we use modesn computer names and invite the tsers to compete with the compuler．The prote is i5 95 includme pep

As specialist soflware producer my tenm of programmers and 】 would like so say that we have to kecp our eye on all the compurer literalure frad always rend HCW，which gives us t sood sprend of essential new and whith sives a good aprend of essenlial news and techmica， informalian proprams etc， all of wluch is necessary in this extulang new gege of computきr．
Aprart from providiar chlerlanmetl，compulers are now will sroundicd in the couniry＇s educaliomal csiablishmenis，and that is why Ch1bur 部做郎 to produce interesing utslites as well as areade and adventure tatnes．
Chbur， 3 Lonsdale Si． Ixlcester LE：2 IBP

## 1． 1 ？ $2=3$

To all chess playise HCW radars；How good is your compuler chess program＂ How tar chat tt see ahead？ Can it solve mate an two move problems？

If any peader sends me an sae plus a 20 p casn ！will send them 12 diagramed chess posttons with solutions．There are mine problems wilh two－moves， two three－move prob＋ems and tine tout－move problem
John Rundle， 26 thestern Rd．Aldershal．Henls GUt1 3PL

Thentre HGM
I am the proud owner of an Oric Atmos．I bought the Almos afier my Spectrum went wrong for the third ume
find that the BASIC is much bereer than the Spectrum＇s and much more user friendly．

1 wans to thank HC＇W for printing programs for the Orie Atmos as software as almost non－existent and i新 very much in need of some games．You first pristed something aboul the Atmes in 1sstese 45

Although HCW does nol tack the Atmos like it does the Spectrum and Tin－99／4A the prograths that are proned always work and are very enjoyable．

Ign Yuiram，Sirond

I felt I had to write and Jet HCW readers know about the good fast service I have Just recelved from ： particular 綰fiware house
Recently ithad an unforlunate mishap with a cassetle program，It was totially my foult．I sent the tape（Rock Storm ti）baik to Hartequin Sofiware on Yarurday 10 November．I expecied it to be relurined ithuct a month latet wath an involce．I was very surprised when if returned on Tuesday 13 November． and very pleased when i found a note inide wat riz ＂Free of charge＂
［f thes tetter gets published it will make a nice charge to the ustal moants and roturs about the software houses．Sy the way the progratm for for the Tl－99／4A and ts very good

Mark Iee，Mallay Tlo－99 AA Esers Club

1 sm writitg in reply to Giraham Buaficid＇s［etier in HCW g8 in wheh he somplains about the lack of software for famslies io enjoy．

My family recently bought a computer． Commodore 64 in fact，and we have had hours of fun using it it the short tume since we obtanned it

I am 15 years old and my school does not yet thave computing facilites so ！ was very pleased when my dad dectided to busy the Commadore

I was beginning to reel rather left out berause many of thy friends have computers and enfoy wising them very much．When I went oul wath them they always used 10 go on and on about the new games they had．Now I am abte to join in and we have great fun
discussing new lactics，
Anyway，to turn back 10 ahe orrginat reason for writng thrs leter．Grahan is absolusely rieht when he says that there is hardly anythig avalable．We have been searching for good games to buy for Christmas and we are almost at a loss as to what to ser
if wonder if any reades cosuld give us some advice on the suthect as we ase sery antatus not to waste money smed games are 50 expensive and yet we would hike to buy one or two new ancs for the Chrastmas hislulay．

Peter Menniag，Retherham

I read with interest the HC H revtew of Eureka is I bought a copy of the game on the day of release
I＇s an adventure 1 have rather miked feefings aboul On the one hand ase good graphes，etceltent use of sound and same heut touches of humour，on the olher is the irruating lack of an save facilisy

There is mothing mace annoylag than to compicte over haili an adventure and have to begat mgat

On the whole I enjoy
 play lets than I would if 1 could save my state of play

Also may 1 hentuly recommend Level 9 adven tures，surely some of the best ever．
Uk Tnmilinson，Havant
P？＋ $4+3$ considencel

Not given io writisug lefters to makanares，（until nowl，I fett obliged to reply to Cyril Berzant＇s recettl leter on Armalrad，Amsolf
I have now had my CPC 464 lor some 1 wo momes and am deloghted wilh II．§ have witilen two or three lelters to both Amsirad end Amsoft end have had wery prompt replies and advace．I have a printer on order sol canndy yel commeal on package orders as such but in their last magazine Amstrad did say that initial order processing problems （птaln－frame computer）had been overcome
In ary event many of my focal agents have had Codename Nant in fos months，so that＇s the moblent

An ardent edventures． may 3 thank Level 9 for so promptly converting for the CPC464． 1 Just hope Betond do Lords of Madrigh and Doom Dark＇s Revenge as soon as prossible．Gilsafi is also convertigg the Quill and this should really help 464 nurers

I din looking forward to better sofiware for Christmas．Already one sect software houses taking advantage of the machine＇s capabslries
I ath delighaed with the Hod and the prompt help and assustante recetved so far．I hope that this lutter will provide a balance．
\＆th H Dasent，Guildford
ㄹand
Hilut

I am writing th reply to Mis Stcanhy or Soulhamplea whose leter was putbished in HCW 解

I amp very pleased to ses that there and more 0 der people and women are becoming inferesied in computers．I think that it is a real thume that pirls are not encourazed more th the technicall subjects when they dre at schoot but are enpected to like things Juke nesdework and cookers

The best jobs for school leavers are in the indusitiss where the new technolog？ has had the most impaci and it is a real shame thal gris often lase oul on the possibility of a very good cafeer in these fields because they arte put off when they are at school
so come on girls，make yourselves beard and be a fot more assertive I work as a computer programmer asd really enjoy miy jots．Is is gred fun bad very very inkeresting．But I find that women ere aery smatl maparity of the people who work in my freld so 1 am especially pleased whet set letters from womer fir HCh who have diccovered the isterest from women tit HC W who have discovered the interest and possibilities of the home metre and are purting thers brains to gond Lue

Judith Watmon．Carduff

Having read Aletier in a recent issue of HCW abou： computers in schools，I teel that I must state my news
on the subyect，
My shool has been teaching computer studies for a year now and ！have learnl an enormous amount about all k．nds of new technology，
Pupils thauld be given every opportunty to use computers at school and 1hey should start ut young as posstble．Once you have reached a certain age you begin 10 worry that all these new ideas are too diffectult for you to understand and that you would be no good if you tried．
I was very wary of compurers when I had no hands－on experience bul now with many hours of progrentiming behond me I feel very confident in lhis subject
1 undersiand compulety now end I realase that they are just lumps of machinery that necd peaple to control thean．Thas tiny solind obvious but there are manty aduts（ancluding my mum） who find them ditficult in understand and are very woreted by them．My mum will gever quesion anything which looks as if ft comes from a computer，she auto－ matically believes It．I expect there are many other middle－aged people like ber．

I think il＇s reality good when I read leners from older perple on the HCW letters page．I was especiaily pleased to set the one from Mrs McCarthy of South． ampton．
Boys alway think that pirls will be useless at any techmeat subject and 1 find tbse expemely irratanang． Wany of the emarls in my class ere better than the boys 버 very many ㅌubjects， matudang compurer sludies．
Anyway thanks HCW for printıng ihus letier（ 1 hope＇） and reep ap the good work
Mary strele，Huld

As has been stated upon numerous occasions, the graphec capapinties of the BBC micro computer are oustanding. It is therefore the am of this article to prove to you that the mult-coloured user defined characters so frequently used by the commerctal software houses are readily avatlable to both you and me for use in our humbee programs.

Before plunging in at the deep end I feel we should re-cap on the basics of user defined character (UDC) definmion on the BBC. The BBC's VDU command is the command used when the programmer wants to send insetuctions to the "VDU dsivers", the part of the machune operalıng system responsible for the printing and manupulation of graphics on the sereen

When wishing to produce UDC's we use the VDU23,n.n, $n, n, n, n, n, n, n$ version of the command. In represents the identification number you have assigned to the character, followed by eight values whech inform the compuser of the shape to be drawn. Although this may appear to be quite a daunting task, the values requited to produce a character in the shape of a man can be calculated quite stmply.

Firstly draw an $8 \times 8$ grd on a prece of paper. Next, number the columns from right to left as shown in Fig.1. Using a penct, shade the appropirate squares untul you have produced the required shape. All that is left to do now is to total up the values of the shaded squares m each row, the value of each square beng indicated at the sop of its column

Figure 1
The VDU23 staiement is then constructed by typing VDU23 followed by the identification number (any number between 224 and 255 ) and the elght values calculated using the grid. The VDU command catculated from our dragram of the man is shown in Fig, 1

To promt the character, type the following lines;

## How to create multicoloured UDES

## In this article John Revis demonstrates how you can take fult advantage of the outstanding graphic capabilities of the BBC/Electron

20 VDU $23,224,60,60,24,126,90$ 90,24,60
30 PRINT CHRS(224)
40 END
Having RUN the program a man should have appeared in the top left-hand corner of the screen To colour the character amend the program by adding the following.

## 25 COLOUR 1

Russing thus program with colour the man red. The man can be printed in vanous sizes by altering the value following the MODE command. bus please ensure that the mode selected is a graphic mode, e B . 0.1 .2 .4 or 5 otherwise the character will not be printed

As yout noticed, by adding the COLOUR statement at line 25 we could prim a coloured character. You have probably also noticed that the character was only one colour. To get around the limitations of the commands as used so far, we must look again at the $8 \times 8$ grnd and our hule man.

In FIg. 2 we have decided which colours are to be used in our character and dinded hom into sections of similar to our
As an example we shall take the colour black as used for his hav and shoes (Fig.3). These give us the character defintion VDU23,225,60,36,0,0,0,0,0,60

Figure 2
We now repeat this procedure for each of the olher three colours giving us a total of four UDC's which should hopefilly. when superimposed, produce our original character.

Figure 3
The BBC computer uses two types of cursor: text cursor and graphics cursor, So far we have been using the text cursor, which allows you to prist a character, ASCII or user
defined, at any character position on the screen. In the case of mode 2 this is a $20 \times 32$ grid. If we attempt to supermpose our four characters using the text cursor, as shown in Program 2, you will see that the only visible character after rumbing the program is the last character pristed. In this case a's the man's trousers.

## I REM Program 2

## 10 MODE 2

20 VDU23,225,60,36,0,0,0,0,
0,60 : REM Harr + Shoes
30 VDU $23,0,24,24,0,0,66,0,0$,
REM Face + Hands
40 VDU $23,227,0,0,0,126,90,0$, 0,0 : REM Shirt
50 VDU $23,228,0,0,0,0,0,24,24$. 0.: REM Trousers
to PRINT: PRINT
70 FOR N $\%=225$ TO 228
(9) PRINT CHRS(NOf ):CHR $\$\left(\mathrm{NO}_{6}(\mathrm{R})\right.$
90 NEXT N \%
100 PRINT: PRINT 110 END

Immedratefy following the statement which prints the character on line 80 there is the stalement CHR\$(8); this is required because having printed the Jorst character the computer automatically steps one characIer space to the right wailing to print the next character. CHRS (8) is the code to move the cursor one space to the left and the next character is therefore printed directly on top of the iirsi one

The grapheses cursor is much more Dexible than the lext cursor. if atlows graphics to be printed anywhere on the screen using a $1280 \times 1024$ ghd for its co-ordinates. It also allows characters to be supermposed By using the command VDU 5 , the text and graphics cursors become one, everything beng printed at the graphics cursor.
Having combined the two cursors you will find that you can no longer primt at a spectived point on the screen using the staicment PRINT TAB(X,Y); mans; the computer must now be given specified co-ordinates before using the PRINT statement, eg. MOVE 640512: PRINT mans. This prons a man m the centre of the screen. By adding the following lines to program 2 you will see the effect of using the graphacs cursor'

15 VDU 5
60 MOVE 640,512
Upon runntng the pragram the separate parts of our man are recombined to produce a complete character and not just his trousers. Now we have the power to create a whole man
from his constutuent parts (DT Frankenstems cat your heart out!). It is now only a short step to give each part a separate colour. As we are prining ar the graphocs cursor we must use the graphic colour statement GCOL to give colour to a printed character.

To avoid any confusion I must explan that the sratement GCOL 0.1 (print graphics in red) can also be written as PRINT CHRS(18),CHRS(0): CHR\$(1). Once the CHR\$(18) statement has been used the computer expects the next two values entered to be the mode of ploting to be used (User Guide p.262) followed by the number of the colour in which the graphics are to be printed By issuing thrs statement before praniong each character, as in Program 3, we cart create a mult-coloured man

## 1 REM Program 3

10 MODE 2
20 VDUS

110 PRINT: PRINT

## 120 END

Program 3 certanly works but ts not exactly elcgant. It also uses a great deal of memory when line 100 has to be repeated eachtime you want to print a man during the game.

Once agan the ever flexible VDU command comes to our rescue: VDU 225 is identical to PRINT CHR\$(225). Line 100 can therefore be replaced with;

100 VDU $18,0,0,225,8,18,0,5$, $226,8,18,0,2,227,8,18,0,4$, 228

This new version is an improvement but the whole VDU statement must st.J1 be typed whenever you wish to grimt a man. Program 4 was Writen to enable all the code to be contamed in a string varable. In thus example we named it man\$. The data required to construct the
character is held in a DATA statement and is READ mso the varable only once, at the start of the program. From that poont onwards the mulacoloured chasacter of the man can be printed at any tume in the program by merely typins PRINT mans

In Program 4 it is the Procedure, PROCdefine character, called at lone 90 . whach is responstble for asssgrung the dala, necessary to produce the multicotoured character of a man, to the varrabie man\$. The technoque of strong concentraton (User Gunde p.64) is used to combine all the CHRS statements used in program 3 line 100 to produce one tong string. mans. This strong when pranted, contains all the information required to carry oul the colour changes and cursor movements necessary to produce our mult-coloured min

One of the malor problems factug the BASIC programmer is the disconcertung rate al which anımated characters slow down once the number of anmated characters beng used is increased. By clever use of the techniques you now have at your disposal it is quite possible to pront characters and glve them the illusion of movement wihout constantly mastructung the computer to re-draw the character in two different poses, theseby creating the movement.

This techaque, which I have always considered as being 'animation without asimation', takes use of the BHC's クashing colours. If you, like me, have ever wondered why the BBC computer wasied one of 35 colours by having both flashung green-rnagenta and magentagreen, then ponder no more They are the very sectet of the techrıque.

## Figure 4

Returning once more to our ittle man on his $8 \times 8$ gnd (Fig 4) even the less observant of you canmot fast to notse that he now has four arms, one pars pornting upwards, the other porning down. This time we will colour his shin and arms to the elbow in magenta. For the forearms pointing upwards we will use colour 10, חashing green-magenta; for the forearms poinamg downwards we will use colour 13, flashing magersa-green

## 1 ReM Program

10 MODE 2
20 VDU 5
30 VDU $23,225,60,36,0,0,0,0$, 0,60 : REM Han and shoes
40 VDU $23,226,0,24,24,0,0,0$. $0,0:$ REM Face (no hands) 50 VDU $23,227,0,0,0,255,24,0$. 0.0 : REM New shirt definiton l.e. no forearms
60 YDU $23,228,0,0,0,0,0,24,24$, 0. : REM Trousers

70 VDU23,229,129,129,0,0,0, $0,0:$ REM Arms up
80 VDU23,230,0,0,0,0.129, 129, 0 : REM Arms down
90 PROCdefine character
$100 \mathrm{man}=\mathrm{a} \$$ : REM assign the coments of as to mans

man
140 PRJNT mans
150 PRJNT: PRINT
160 END
170 DEP PROCdefint characICr
18B RESTORE 260
190 a $\$={ }^{* 4+1}:$ REM ensure the temporary string as is empty 200 FOR N\% = 0 TO 34 : REM number of stems of data
210 READ char $\%$
220 aS =as + CHR\$(char宛) REM concalonase the individual values into a\$
230 NEXT No
240 ENDPROC
250 REM character đata for -
200 DATA $18,0,0,225,8,18,0$, $1,226,8,18,0,5,227,8,18,0$, $10,229,8,18,0,13,230,8,18,0$, 4.228

Upon rumning program 5 you will see the weird effect of a man with four arms, all flashing difterent colours, You may thonk at this point that the whole experiment has been a fallure. If you have fanth for just a little longer, and replace line 80 with the following, all will be revealed

80 GCOL $0,130:$ CLS : REM Colour background green

Now when you RUN the program you will see that our litte character waves away quite happrily even though the program has stopyed runaing. With a little imagination this technaque can be used for innumerable applications, e.g. rotating the blades of a helecopter or turnung the wheels of a car, and all without wasting the computer's valuable time minstructing it to re-draw the characters to produce the desired effects.

## RAM Turbo Joystick Interface Sinclair spectrum/ pectrum

RAM Efectrontes. 106 Fiect Ru Fleet, Hampstire GU13 9PA

You can'! have falied to noture the full page, fill colowr edverts for this interface th the compules press: and you cantr have faled to rotice the price. [s's 83 more ham Simelear's own Interface 2 What do you pel for the extra montey, and ts it worth?

The Turbr is contained in a sturchly moutded case. vers sitnilas to the specirime itself. A sleck, low lymis unt, there"s nd problem of It futing to mate wath The Spectum ${ }^{3}$ as is the case with some olher unts. Also mankied in is a large enb with a hoid in it, through which your power supply tead fils. In olher words you have to disconnect the powes supply 10 fit t, , which is a sood thing! If will prevent you from blowing your Spectrum's minurds. Quite angenlous*

The white of the Specirumes expanston port is repeated at the rear of the Turbo, 50 vou can cotinect other idd-ons quile casily withoul havigg to remove the joystutk port every lume Which doteft't do the edpe connector dily goad at all. This th inpther plus point over lnterface 2, whith onty provides the Jities for the now dhecantinucd 2 t Printer. Alop the unt is a ROM curifidge porf with a hatch, fof all those caricudge grmea from Stat Wars whith we were promised, but whach have never materalaned tt wadd seem to be a treal way to give us other目nguakes. Btt BAblC even, that it louks loke nowone is dong

Just behind the ROM hatith durk two standard minepin D sockess for the joysticks, and thets is the really clevar but. In nommal use the left hard port stmblates Interface 2's joystick l, that 18 keys $6,7,8$, 9 , and 0 to fire, whtist the raght hand port is joystick 2 , keys 1, 2, 3, 4, and 5. If, however, the Turbo defects that a game as compatible whth the Kempsion protocos (IN 31), then the right hand port automatically switches Io this, without your havine to do anything! Quise magral!!

And that's not all! II yout game uses the cursor keys instead, then swatch off yotar Spectrath. connect the Turbe, thea, holding the fire butzon on your joysisck down, switch on again. Yout Turbo th now configured with the correct keys. In other

## David Martin takes a close look at RAM's new Turbo joystick interface. Read what he thinks

words, whatever foystick prolacol your same is destgned for, the Turbo can cope. This is really very handy.

The whole thing came very soundly packed, and is accompaned by a thorough mantial which features sonte useful do's and don'ts, and teps for writeng joystick control into your own progerallis.

In use, the Turbo is very stranght forward. You shoutd never nited to dicconnect it. I say should, because although RAM says the Turbo it completely Macradirive-contpattble and also companste

Wuth Centronics printer mterfaces which can be hung on the back, in practice mthe seerts to have produced some peculiar Microdirve fatures when used in conjunction whth the Tasman Prthter Interface. I hoped to avoid al] the connecting and disconrectiry problems assoctated wath joystick interfaces with no through ports, As it is, I'te pud al let int moth to face evactly the same problem. In addition, some games didn't seem to lake the aummatic switchatig (o Kempston fachiny, nolably Braxx Blalf frem Mactomega; 1 had to Use the

Sinclate protocol, or the gatme crashed

Overall then, a moble altempl to provide more Eachities thath anyone else wthan the confines of one box, and that's what you gay the extra for. I would like 10 recommend it wholencartedly, bul, un view of the upredictable quiriss noted ahove, I can't. You will have to acsale tor youres whelloc it will nuel all your requarements, and whether the extra facilaties it olfesp mert the extra cash, it would be materesthg to compare it whth the batest offermgs from dk'tromes and Kempston
II.M.
